## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. The information disclosure statement filed January 12, 2004, fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered. The applicant did not provide cited reference number 11, "3D Model Acquisition From Extended Image Sequences".

### ***Allowable Subject Matter***

2. Claims 1-84 are allowed.

The following is an examiner's statement of reasons for allowance:

3. As to claim 1, 29 and 57, none of the prior art teach or fairly suggest the limitations of "finding spatially local persistent feature groupings from the uncalibrated views captured at an uncalibrated image capturing device location", "iteratively performing the act of finding spatially local persistent feature groupings for a subset of the uncalibrated image capturing device locations available" and "computing correspondence between sets of feature groupings from two uncalibrated image capturing device locations for a subset of pair-wise combinations of uncalibrated image capturing device locations", in combination with the other limitations of the

Art Unit: 2624

claims. The prior art of USPN 6,819,318 to Geng, discloses a process of creating 3D models using uncalibrated image devices and registering 3D models using local boundaries (column 4, lines 32-47). However, Geng does not teach or fairly suggest finding spatially local persistent feature groupings from the uncalibrated views captured at an uncalibrated image capturing device location, iteratively performing the act of finding spatially local persistent feature groupings for a subset of the uncalibrated image capturing device locations available and computing correspondence between sets of feature groupings from two uncalibrated image capturing device locations for a subset of pair-wise combinations of uncalibrated image capturing device locations, as disclosed in the limitations of claims 1, 29 and 57.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US 2005/0088435 to Geng discloses 3D modeling.

US 2005/0089213 to Geng discloses 3D modeling.

US 2007/0024611 to Ingram discloses 3D modeling.

US 6,009,190 to Szeliski et al. discloses 3D modeling.

US 6,157,747 to Szeliski et al. discloses 3D modeling.

US 6,256,036 to Matsumoto discloses 3D modeling.

US 6,393,163 to Burt et al. discloses 3D modeling.

US 6,396,491 to Watanabe et al. discloses 3D modeling.
